CT	7/17/96			10	<input checked="" type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:

Sockeye observed on 7/11/97 was on bank eaten by mink & IDed by fish biologist Ken Hodges

Site: Stump Lake, Montague Island

Target species: Cutthroat trout

Latitude Longitude: NA

Date: 4/25/96, 4/26/96

Collection: no collection made

Notes: One Dolly Varden, one cutthroat trout caught deep in lake.

Juvenile coho caught in traps in inlet stream. Water temperature 2 C.

Date: 7/17/96

Target species: Cutthroat trout

Collection: 20 cutthroat trout

Mean Size: 285 mm

Notes: Traps were ineffective. Hook and line used for sampling.

Fished inlet, outlet and lake.
