Nomination for Waters Important to Anadromous Fish

Region: SOUTHCENTRAL | USGS Quad: Seward B7 Seward A7

Anadromous Water Catalog Number of Waterway: 244-30-10010-2250-3030 - 4017

Name of Waterway: south fork Snow River ☑ USGS Name ☐ Local Name

☑ Addition ☐ Deletion ☐ Correction ☐ Backup Information

For Office Use

Nomination # 99 319			
Revision Year: 00	Regional Supervisor		2/17/00 Date
Revision to: Atlas ___ Catalog ___ Both X	AWC Project Biologist		2/8/00 Date
Revision Code: A-2	Drafted		4/7/00 Date

OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
red salmon	7/24/99			48	☑
					☐
					☐
					☐
					☐

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Saw 4 dozen red salmn in spawning colors in main stem of the south fork and also in clear water beaver ponds which are on the north side of the river, downstream of Boulder Creek (local name for creek coming from glacier fed drainage which is first major drainage as you go up South Fork Snow River. Upper location of sighting is T2N R1E Ne quarter of SW corner section 28. Numerous Brown bears are present feeding on the salmon.
