OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
	7/27/88				<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: The location of the stream course depicted in the original nomination for this stream was determined by dead reckoning. Plotting the recorded coordinates obtained from the helicopter navigation system reveals that the survey station was improperly located. In addition, surveys of the area conducted by me in September 1999 revealed no stream course at the location currently depicted. Site photographs taken in 1988 match 1999 observations of the recommended channel location.

 Michael Wiedmer

Address:

Alaska Department of Fish and Game, Habitat and Restoration Division
 333 Raspberry Road
 Anchorage, AK 99518

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Catalog of Waters Important for Spawning, Rearing or Migration of Anadromous Fishes per AS 16.05.870.

Signature of Area Biologist: _____

CHANGE STREAM CHANNEL & WATER POINT
TO CORRECT LOCATION.

Subject: Anadromous Atlas Suggestion

There is a mapping error (stemming from an incorrect nomination) in the upper Deep Creek watershed. The upper ~3 miles of stream 244-20-10100-2070 is not in the correct drainage. Talk to me when you have time and I'll show you the details and we can figure out the proper resolution.
