OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Chinook Salmon	7/14/98	Probable	Yes	Yes	<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: During a joint Department of Natural Resources, Division of Forestry, and Alaska Department of Fish and Game, Habitat and Restoration Division, inspection of the proposed Dome View State Timber Sale, we observed both migrating adult (3) and rearing (25+) chinook salmon at the bridge location identified on the attached map (Station OJ049). Rearing chinook salmon were holding in slack water near the bank and were observed from a distance of approximately 0.5 m. Migrating adults were observed from the bridge at an elevation of approximately 2.5 m above the stream surface. The location of the bridge was determined with differential (averaged) GPS coordinates by Olof Jacobsson, ADF&G. ADF&G staff observing fish were Lance Trasky, Regional Supervisor, and Michael Wiedmer, Habitat Biologist.

THERE IS NO BARRIERS TO MIGRATION NEAR THIS SITE (UPSTREAM)  
THEREFORE ADULT CHINOOK MAY CONTINUE MIGRATING SOME DISTANCE UPSTREAM.

Name of Observer (please print) Michael Wiedmer, Habitat Biologist  
 Date: 6/16/00 Signature:   
 Address: Alaska Department of Fish and Game  
333 Raspberry Road, Anchorage, AK 99518

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Catalog of Waters Important for Spawning, Rearing or Migration of Anadromous Fishes per AS 16.05.870.
