OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Coho salmon	8/15/01		3		<input checked="" type="checkbox"/>
Cutthroat trout	8/15/01		4		<input checked="" type="checkbox"/>
Dolly Varden char	8/15/01		4		<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Fish captured with Gee minnow trap baited with disinfected salmon eggs, 1-2 hour soak time. Trap coordinates determined by GPS - Garmin XL12 w/external antenna, averaged to <30' position error. No barriers detected upstream. No barriers detected between coho and trout and char or upstream.

No traps set above upper limit.

Confirmation of sea-run trout from Jones, J.D. and C.L. Seifert. 1997. Distribution of mature sea-run cutthroat trout overwintering in Auke Lake and Lake Eva in Southeastern Alaska. Pages 27-28 in J.D. Hall, P.A. Bisson, and R.E. Gresswell, editors. Sea-run cutthroat trout: biology, management, and future conservation. Oregon Chapter, American Fisheries Society, Corvallis.

Channel type range - FP3, AF1, MM1 - from Channel Type Users Guide, USDA FS, 1992
