OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
See Attached Data					X

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Add stream to AWC based on historic ADF&G Commercial Fish observation data (See attached). Stream mouth located at Latitude: 58.79064, Longitude: -135.07635.

*Fish only near stream mouth*

I have no notes available for 1994 and Mike worked for CF prior to my arrive but believe that these streams support small populations of these species based on conversations with Ray Staska CF- retired. If you need further varification, you can contact him at 766-2610 in Haines.

Randy.

I suppose I should of asked you while I had you on the phone. What I was wanting to get a hold of Michael for was information on the extent of Pink and Chum use in 115-31-038. We're going to add it to the AWC based on information in the CF database. You signed off on the nomination I sent down but I need to know how far up the stream it is used by Pink and Chum. The database notes that Michael Gaede did a foot survey on it in 1994. Do you have any notes or info that would indicate how far up we have noted fish? If so can you mark the upper extent on the attached jpeg and send it back to me. Thanks again.
