OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
coho	April 24 - May 1, 2001		30+		<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Location; Township 28S Range 37E Section SE 1/4 35 ; Latitude N59 degrees 26.442, Longitude W139 degrees 5.497 (NAD27). Stream is number 1 on the map.

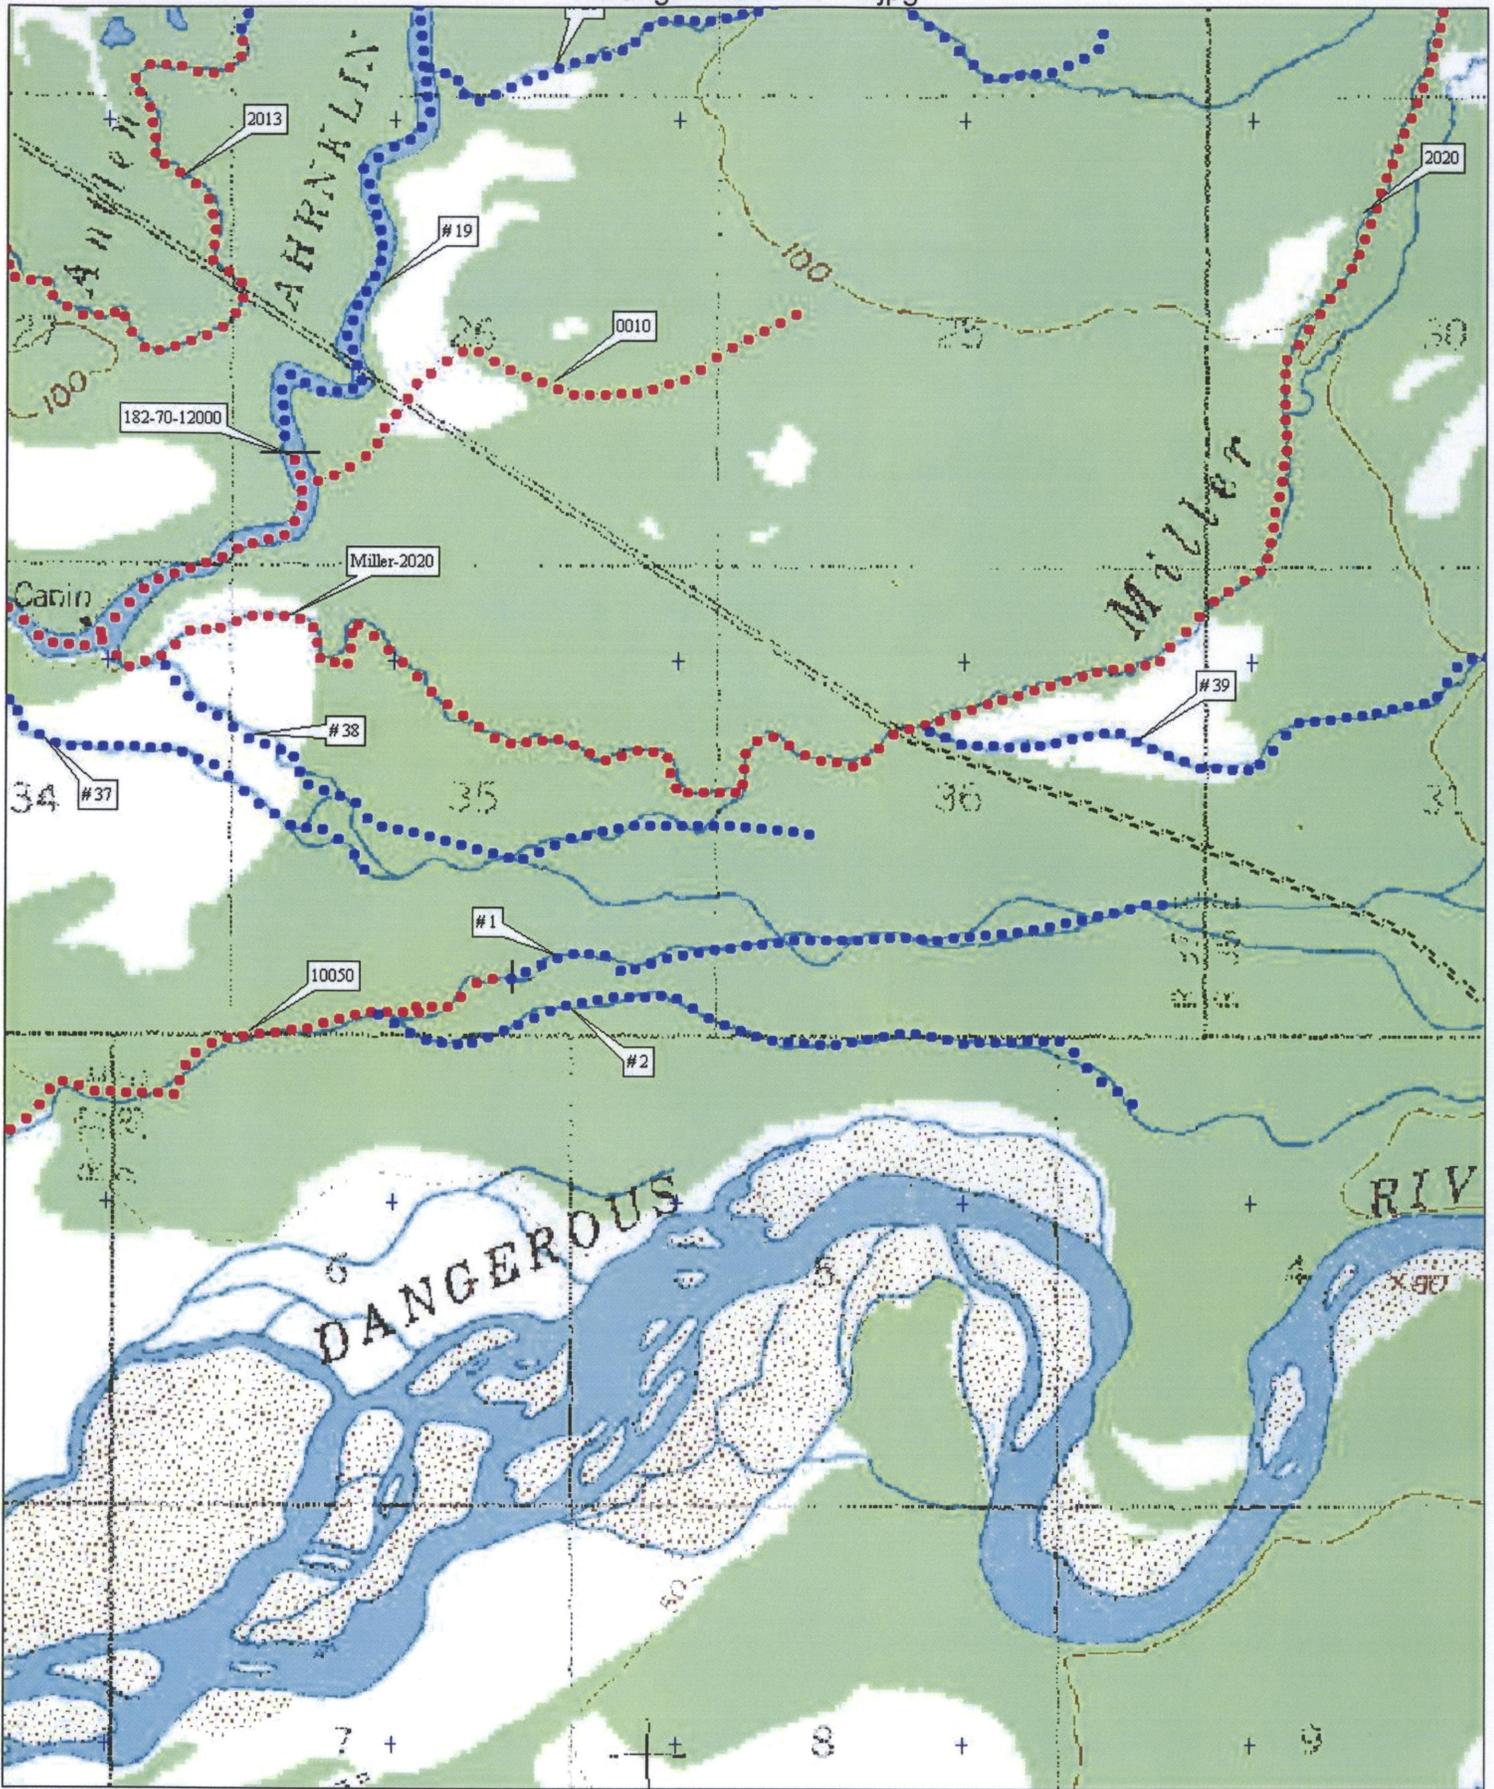

Stream characteristics: Upper extent of -10050. Stream is braided and influenced by surface runoff at times. Width varies from .7 - .9m, depth from .3 -.6m. Substrate is mixed from sand and fine silt to clay. Overstory is mostly deciduous - cottonwood and willow. Seasonal rearing habitat, but juveniles were readily found throughout the reach. Area has been damaged by ATV traffic, altering surface runoff pattern.

Stream surveys were part of the Yakutat Fish Habitat and ATV Trail Assessment project. Field crews surveyed streams for fish using baited minnow traps. Soak times for traps were usually less than 30 minutes per trap/ two traps per sample site. Captured fish were identified and released on-site. Field teams were comprised of ADF&G and Yakutat Ranger District personnel.

Subject: more on 10050

Hey Phil,

10050 looks from the photo that it's more of a trib to the Dangerous than it's own stream. It currently doesn't have any cataloged tribs. Before we start adding any how do you feel about changing it's number to that of a trib to the Dangerous. Potential impacts will be any permit files you may have.
