Nomination for Waters
Important to Anadromous Fish

AWC Volume (SE) SC SW W AR IN USGS Quad Ketchikan B-5

Anadromous Water Catalog Number of Waterway Tributary to 101-47-10250-2007-3015

Name of Waterway tributary to Schoenbar Creek USGS name ____ Local name Patty Creek ARCH#5912

Addition X Deletion ____ Correction ____ Backup Information ____

For Office Use

Nomination # 01 531

Revision Year: 2001

Revision to: Atlas ____ Catalog ____ Both X

Revision Code: A-Z

Regional Supervisor — Date 12/4/01

[signature] — 1/4/02

Drafted — Date 2/5/02

OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous
Co	5/9/01		X	X	X
CT	5/9/01	?	X	X	

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as any other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Two traps we set on tributary indicated on map. With a 15 minute soak the first trap caught a 6" CT, this trap was pulled and reset, but then caught nothing. After a 1 hour soak the second trap caught 4 cutthroat and 1 coho (young of year). Previous to this, on April 10, 2001, dozens of rearing coho of an older age class were observed in this same area. No traps were available on that date, but it is possible these older rearing coho had already begun their downstream migration from this area by 5/9/01?

OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous
CO	7/12/01		x	x	x
CT	7/12/01		x	x	
DV	7/12/01		x	x	

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as any other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: On 7/11/01 Six traps were set at two tributaries as shown on the map. The next morning the traps were pulled; all traps contained fish as follows: #1 - 3 CT, 1 DV ; #2 - 1 DV, 3 CT ; #3 - 2 CT ; #4 - 2 CO, 2 CT, 4 DV ; #5 - 3 CT 2 DV ; #6 - 1 CO The tributaries above the confluence (sta # 2A-2+55) are small (2-5') but low gradient until several hundred feet above the confluence. Numerous juvenile coho and also unidentified resident fish were also observed in the stream between the confluence (aka trap #4) and Schoenbar Creek (101-47-10250-2007)
