Anadromous Water Catalog Number of Waterway

Name of Waterway   USGS Name  Local Name

Addition  Deletion  Correction  Backup Information

For Office Use

Nomination #	<u>03 004</u>		<u>4/25/2002</u>
Revision Year:	<u>2002</u>	Regional Supervisor	Date
Revision to:	Atlas _____ Catalog _____ Both <input checked="" type="checkbox"/>		<u>4/26/2002</u>
Revision Code:	<u>A-2</u>	AWC Project Biologist	Date
			<u>4/26/02</u>
		Drafted	Date

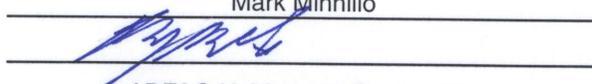

OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
	ALASKA DEPT. OF FISH & GAME				<input type="checkbox"/>
	APR 26 2002				<input type="checkbox"/>
	REGION II				<input type="checkbox"/>
	HABITAT AND RESTORATION DIVISION				<input type="checkbox"/>

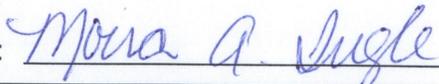

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

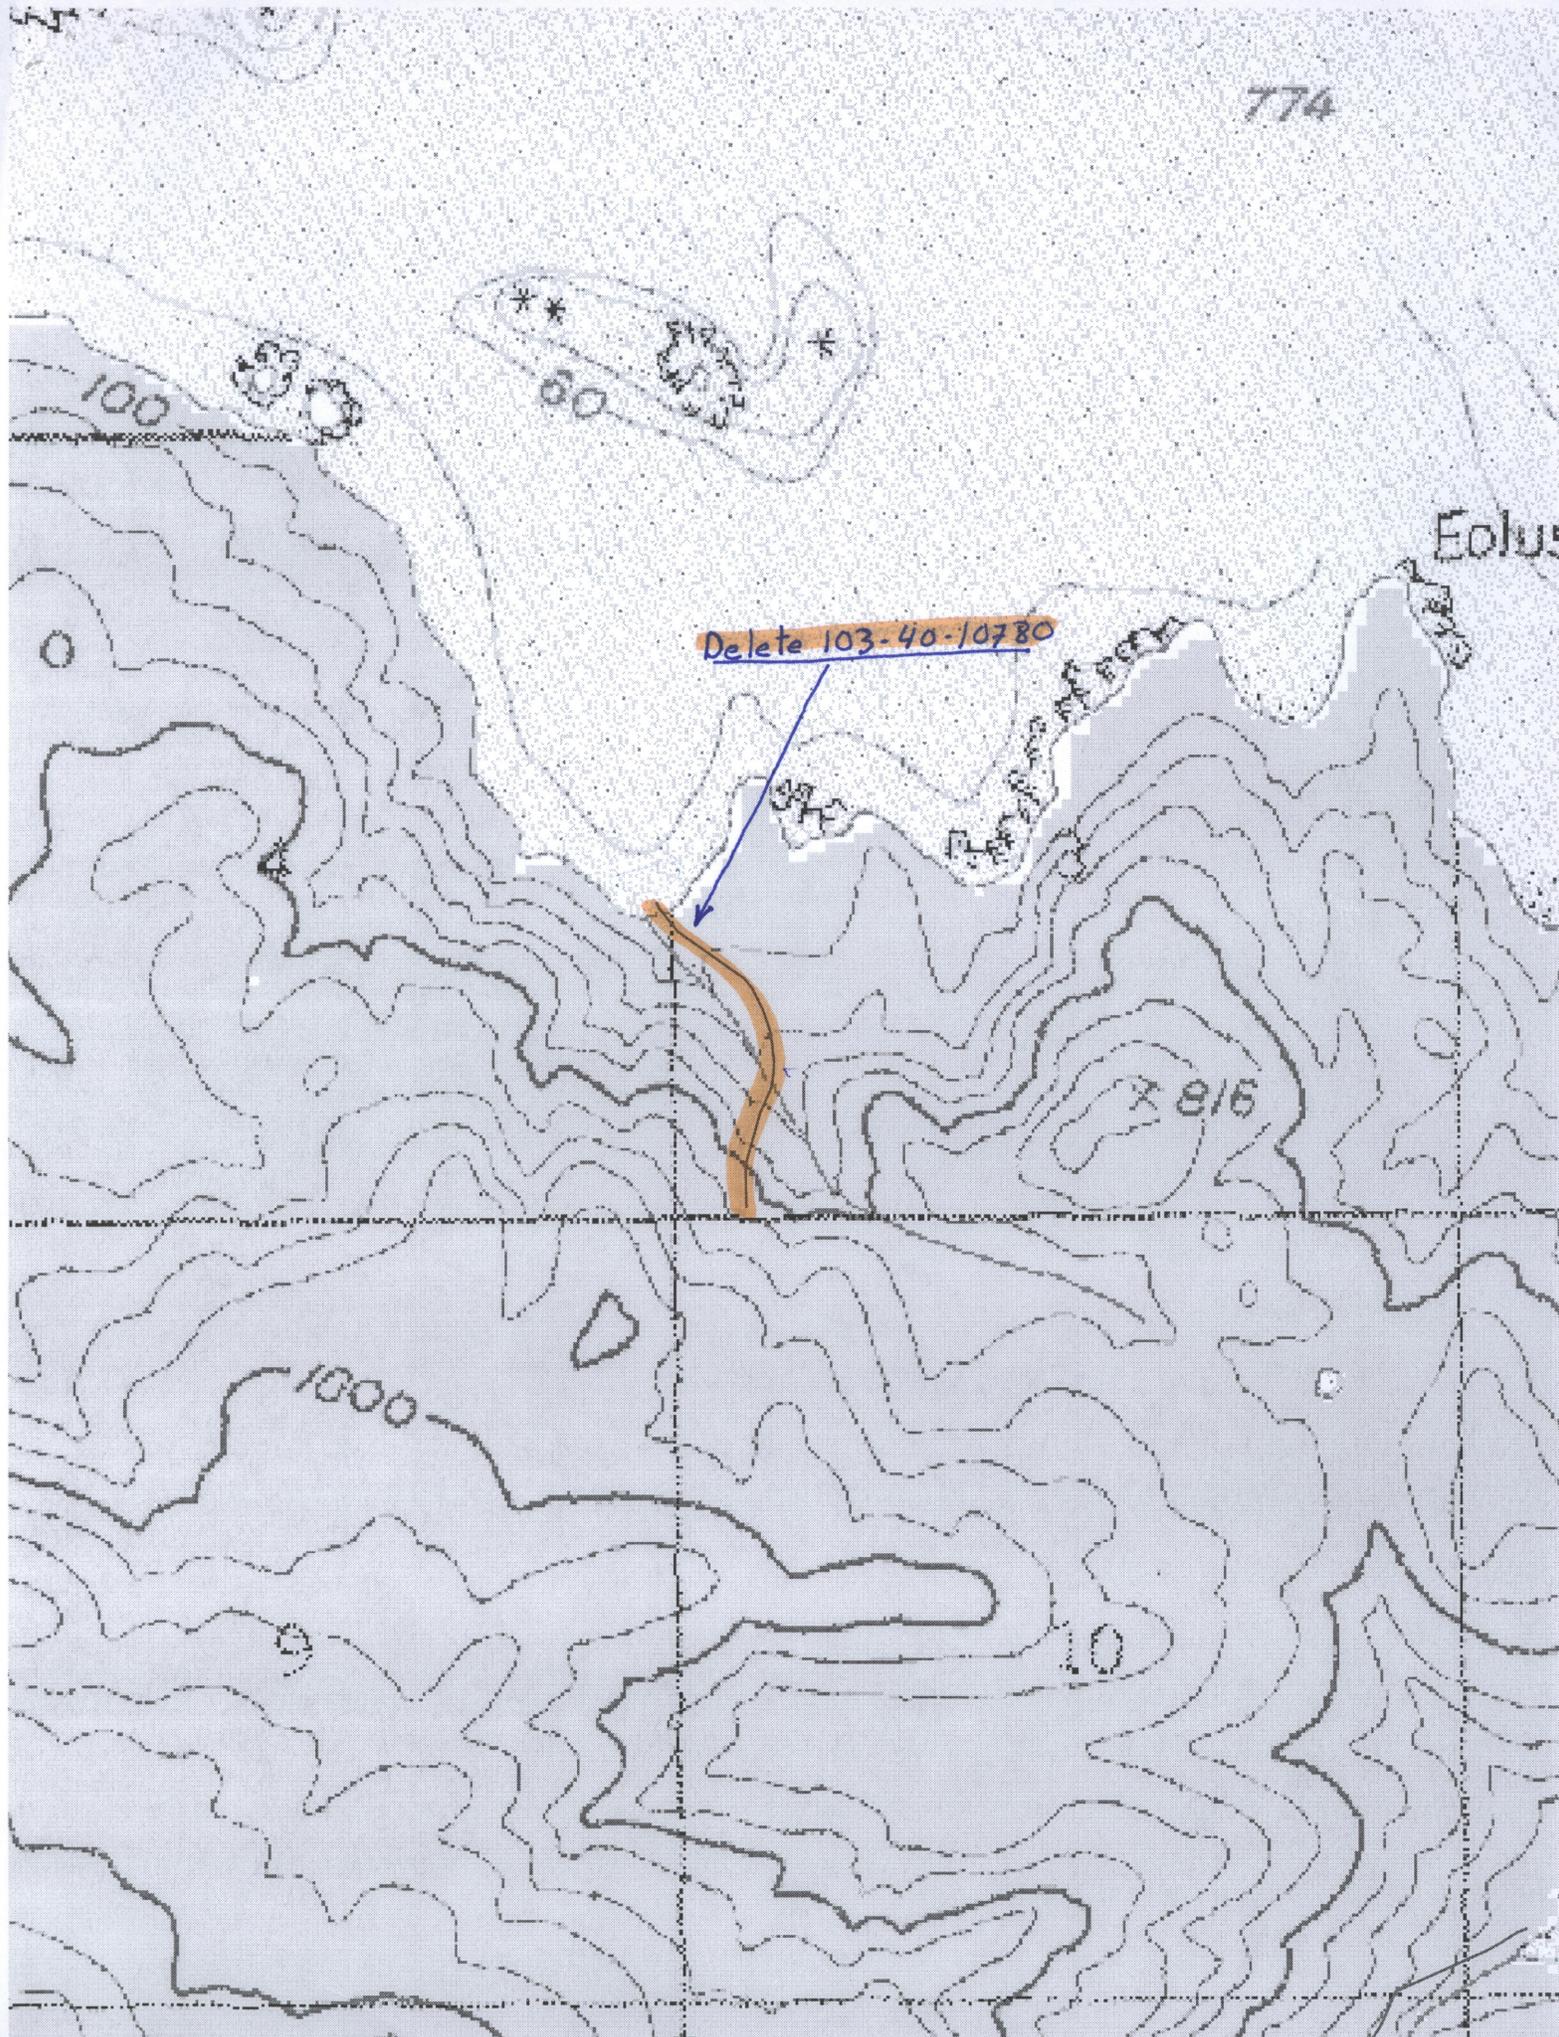

**Comments:** On April 10, 2002 I conducted a stream inspection of cataloged stream number 103-40-10780 in order to determine the upper extent of anadromous habitat. During my inspection I discovered that this stream has a gradient of greater than 15 percent beginning at the mouth of the stream. The stream is not accesible to anadromous fish and the habitat consists of large boulders not conducive to spawning. There are few pools or resting places in the stream due to the steep gradient

**ACTION:** Delete stream number 103-40-10780 from the *Atlas and Catalog of Waters Important for Spawning, Rearing or Migration of Anadromous Fishes*.

Name of Observer (please print): Mark Minnillo  
Signature:  Date: 4/16/2002  
Address: ADF&G Habitat and Restoration  
P.O. Box 668 Craig, AK 99921

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Catalog of Waters Important for Spawning, Rearing or Migration of Anadromous Fishes per AS 16.05.870.

Signature of Area Biologist:  Revision 3/97
