OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
nk Salmon (<i>Oncorhynchus gorbush</i>)	8/26/2004	X		X	<input checked="" type="checkbox"/>
nk Salmon (<i>Oncorhynchus gorbush</i>)	8/30/2004	X		X	<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:

While conducting aerial surveys for salmon escapement, approximately 1,200 pink salmon were observed on 8/26/04 and 300 on 8/30/04 in the immediate mouth location of the stream. Pink salmon were assumed to spawn in the stream. The stream mouth is located at 133.674272 W. long. and 56.537383 N. lat. The overall stream length is ~1,900 meters. The stream end point is located at 133.644732 W. long. and 56.537463 N. lat. The extent pink salmon utilize the stream is unknown. It is located approximately 1,400 meters north of stream 10531-10070.
