AK4 *2/24/05* *2004*

Nomination #	<u>1573</u>	<i>WJG</i>	<u>2/24/05</u>
Revision Year:	<u>2006</u>	Regional Supervisor	Date
Revision to:	Atlas <u> </u> Catalog <u> </u>	<i>[Signature]</i>	<u>12-28-04</u>
	Both <u>X</u>	AWC Project Biologist	Date
Revision Code:	<u>A-2</u>	<i>[Signature]</i>	<u>3/14/05</u>
		Drafted	Date

OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
coho salmon	6/1/2004		X		<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: On June 1, 2004, as part of a FRPA bridge location inspection, I observed juvenile coho salmon in a tributary to cataloged stream 103-40-10090. The location of the observation was approximately 3000 feet upstream of the confluence with stream 103-40-10090. An electrofisher was used to capture the juvenile coho salmon. This stream is longer than 3000 feet and most likely contains coho salmon further upstream however, only the lower 3000 feet of the stream was inspected. As a note, for a distance of 2000 feet upstream from the confluence with stream 103-40-10090, this tributary is heavily influenced from naturally carbonated water and contains heavy flocculant on the substrate. No coho juveniles were observed in this section of the stream. Above this 2000 foot distance the stream is clear and provides good spawning and rearing habitat.

Action: Add stream 103-40-10090-xxxx for a distance of 3000 feet to include coho salmon.

Add new stream w/ COP or CCR

Name of Observer (please print):

Mark Mignillo
