OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
pink salmon	8/5/2004	X		X	<input checked="" type="checkbox"/>
chum salmon	8/5/2004	X			<input checked="" type="checkbox"/>
coho salmon	8/5/2004		X		<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: On August 5, 2004, I observed adult pink and chum salmon, and juvenile coho salmon approximately 6000 feet upstream of the end of the cataloged portion of stream 103-40-10090. Minnow traps were used to catch the juvenile coho salmon and the adult pink and chum salmon were observed visually.

Action: From the upper extent of the cataloged portion of stream 103-40-10090, add an additional 1000 feet to stream 103-40-10090 to include pink, chum, and coho salmon.
