OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
N/A	3/16/2005				<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: On March 16, 2005, as part of a FRPA inspection, I observed a coho barrier waterfall at NAD27 GPS point 133.23337 W, 55.34289 N. This high velocity bedrock waterfall had an estimated gradient of 25 percent. This stream is cataloged as anadromous beyond this waterfall and should be adjusted to reflect this coho barrier. Please reference 103-50-10220 Nomination Map.

Actions: Remove the upper limits of 103-50-10220 beyond 133.23337 W, 55.34289 N.

Shorten stream to pt indicated, add barrier

see map 05-127 streams added

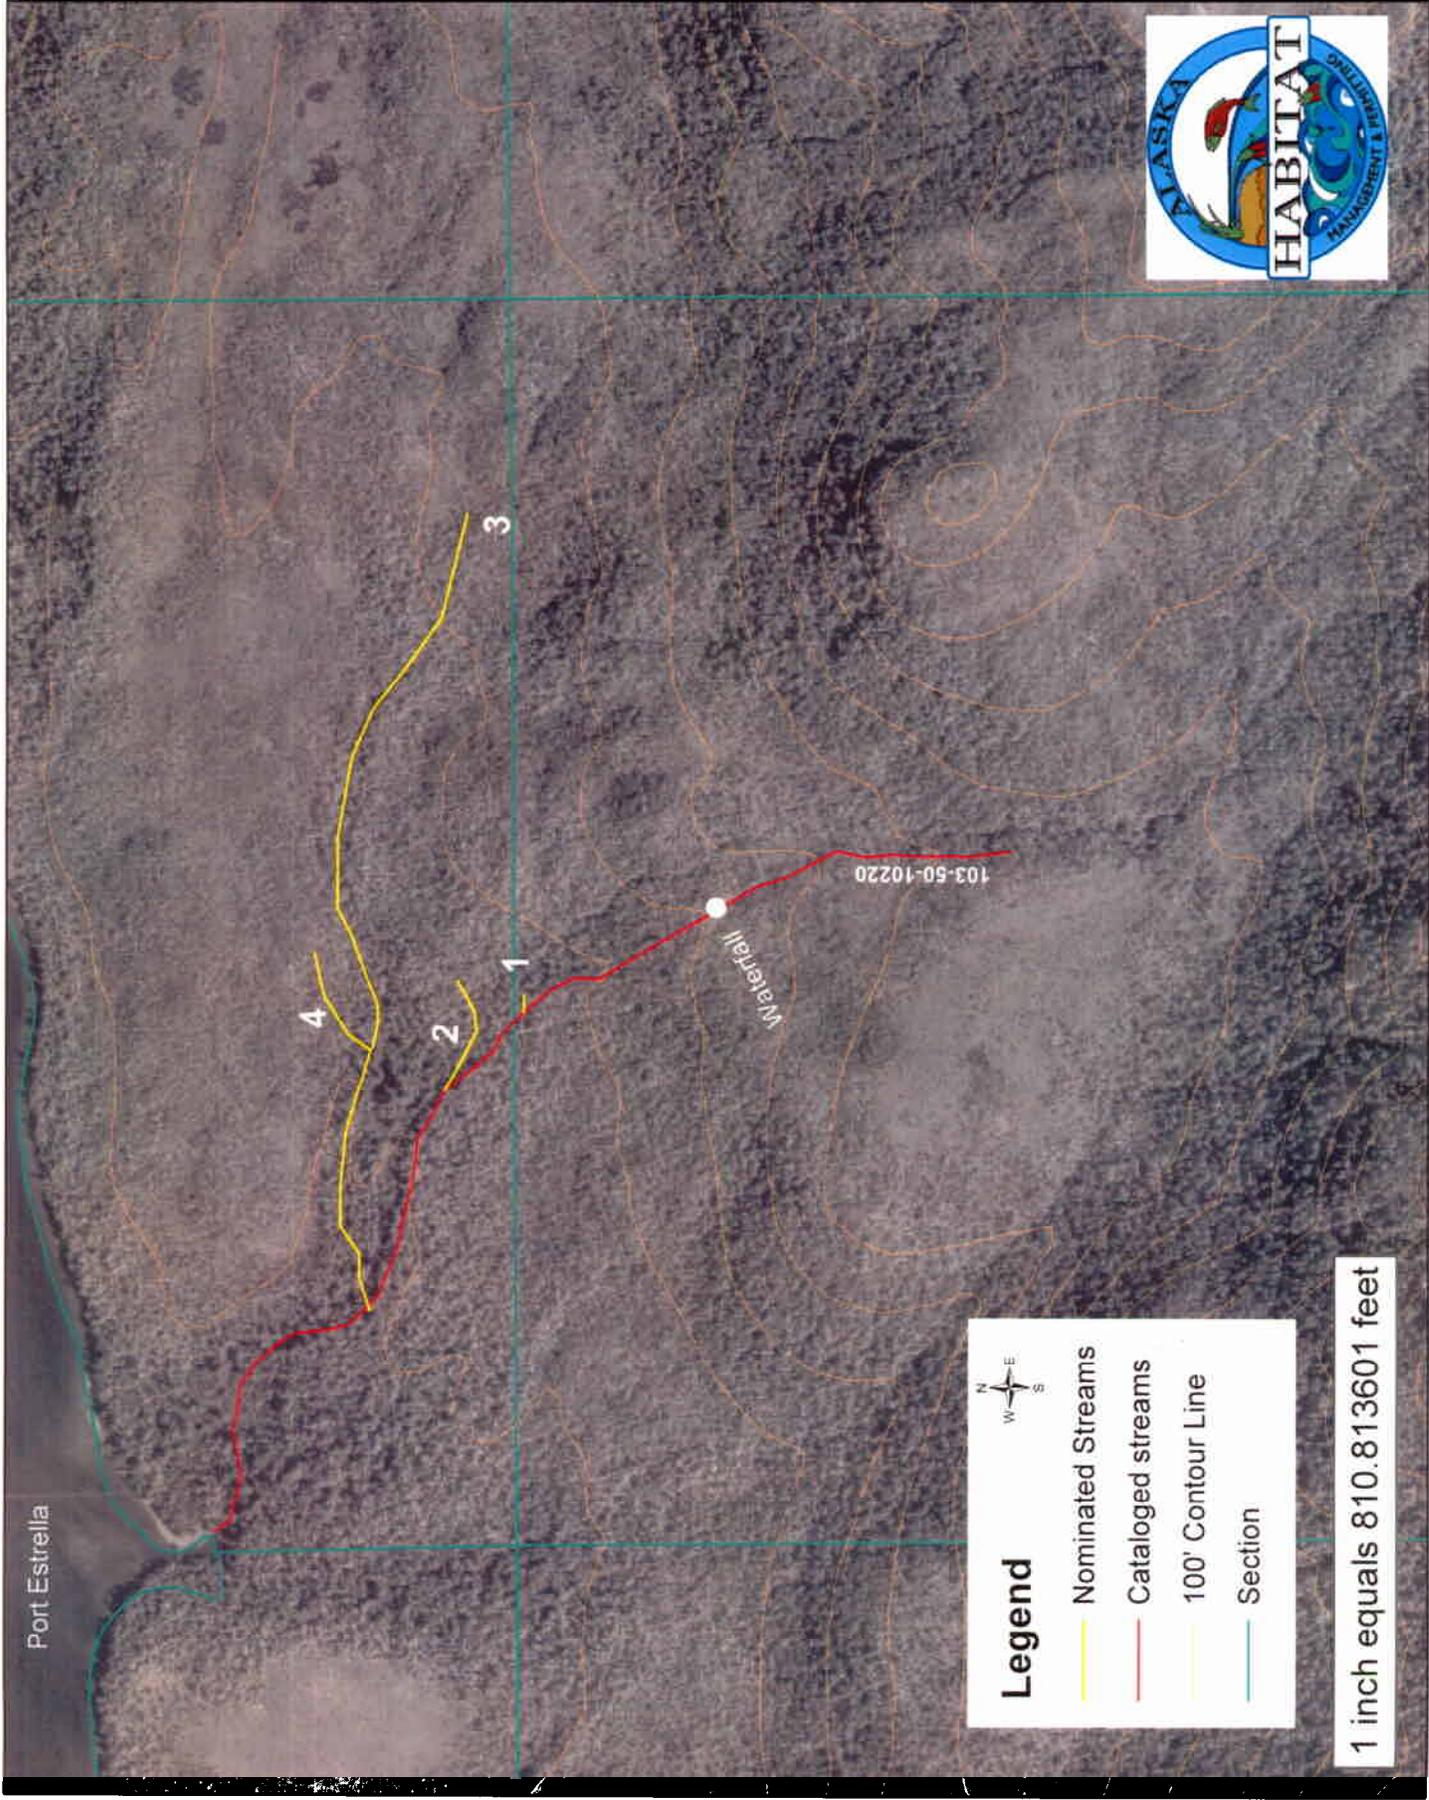

Name of Observer (please print): Valerie Blajeski, Habitat Biologist II
 Signature: *[Signature]* Date: 10/27/2005
 Address: ADNR Office of Habitat Management & Permitting
P.O. Box 668, Craig, AK 99921

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Fish Distribution Database.
