OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
N/A					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: On March 23, 2005, as part of a FRPA inspection, I observed a fish barrier waterfall located 300 feet upstream of NAD27 GPS Point 133.51747 W, 55.50133 N (A weak GPS signal did not allow for a specific point to be taken). The waterfall had a height of 12 feet, a gradient of 40 percent and did not have a plunge pool.

Actions: Remove the upstream segment of 101-45-10300, 300 feet upstream of GPS Point 133.51747 W, 55.50133 N.

1310
Remove upstream segment 300 Ft above way pt
add barrier
