OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
coho salmon (4)	<u>8/2/06</u>		X		<input checked="" type="checkbox"/>
dolly varden (21)	<u>8/2/06</u>		X		<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:
 Fish captured by trapping
Add new stream w/coho salmon rearing

They aren't as accurate as I'd hoped. I just got a forest road layer (each point was taken on the road) and a point file from that looks more accurate than mine. I added a field in the attribute table that says what I caught to make it more clear and included stream numbers for already cataloged streams. I'll email you the new shapefile tonight and will be in at 7am tomorrow. Thanks.

ArcMap was able to project shapefiles, the attached pdf displays them.
Document was created as 11" X 17" (in case you want to print it).
How do the pts match reality?
