They aren't as accurate as I'd hoped. I just got a forest road layer (each point was taken on the road) and a point file from that looks more accurate than mine. I added a field in the attribute table that says what I caught to make it more clear and included stream numbers for already cataloged streams. I'll email you the new shapefile tonight and will be in at 7am tomorrow. Thanks.

ArcMap was able to project shapefiles, the attached pdf displays them.
Document was created as 11" X 17" (in case you want to print it).
How do the pts match reality?

Waters Important to Anadromous Fish are listed pursuant to AS 41.14.870. Specified species distribution and life functions reflect known data. Actual distribution and use may extend beyond specified limits. Migration upstream and/or downstream is assumed for specified stream reaches.

SPECIES CODES	
CO	coho salmon
CH	chum salmon
K	king salmon (king)
P	pink salmon
S	sockeye salmon
AC	Arctic char
CT	cutthroat trout
DV	Dolly varden
SH	sheefish
SP	inconnu (sheefish)
W	whitefish
OU	outflow
SM	snails

LIFE STAGE CODES	
p	Present
m	Migration
r	Rearing
s	Spawning
