OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
pink salmon	08/29/2006	✓		✓	✓

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

**Comments:**  
 On August 29th, Jarrod Sowa, Jasson Hass, and myself, Angela Burrignt observed approximately 10-20 pink salmon spawning in the lower reach of a tributary to Sitkoh Creek. We were there taking discharge measurements on several major tribs to Sitkoh Creek while working with ADF&G. The tributary noted above that we observed salmon in is a major tributary on the downstream right bank of Sitkoh Creek just below the outlet of the lake.

Waters Important to Anadromous Fish are listed pursuant to AS 41.14.670. Specified species distribution and life functions reflect known data. Actual distribution and use may extend beyond specified limits. Migration upstream and/or downstream is assumed for specified stream reaches.

SPECIES CODES	
CO	coho salmon
CH	chum salmon
K	chinook salmon (king)
P	pink salmon
S	sockeye salmon
AC	Arctic char
CT	cutthroat trout
DV	Dolly varden
SH	sheefish
SP	inconnu (sheefish)
W	whitefishes
OU	oudection
SM	smelts
ST	sturgeon
AL	Arctic lamprey
LP	lamprey (undifferentiated)
PC	Pacific lamprey
LV	river lamprey
LIFE STAGE CODES	
P	Present
M	Migration
R	Rearing
K	Resident
S	Spawning
