OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Pink	24 Observations from 1981-2007	Yes			<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

**Comments:** This system was surveyed 25 times from 1981 to 2007 while conducting aerial surveys of the area. Pink salmon were observed in 24 of those surveys. The dates the pink salmon have been observed range between July 21 and September 3. The numbers of pink salmon observed range between 200 and 9,000.

Stream Mouth Location: 56 42.216/-134 22.577

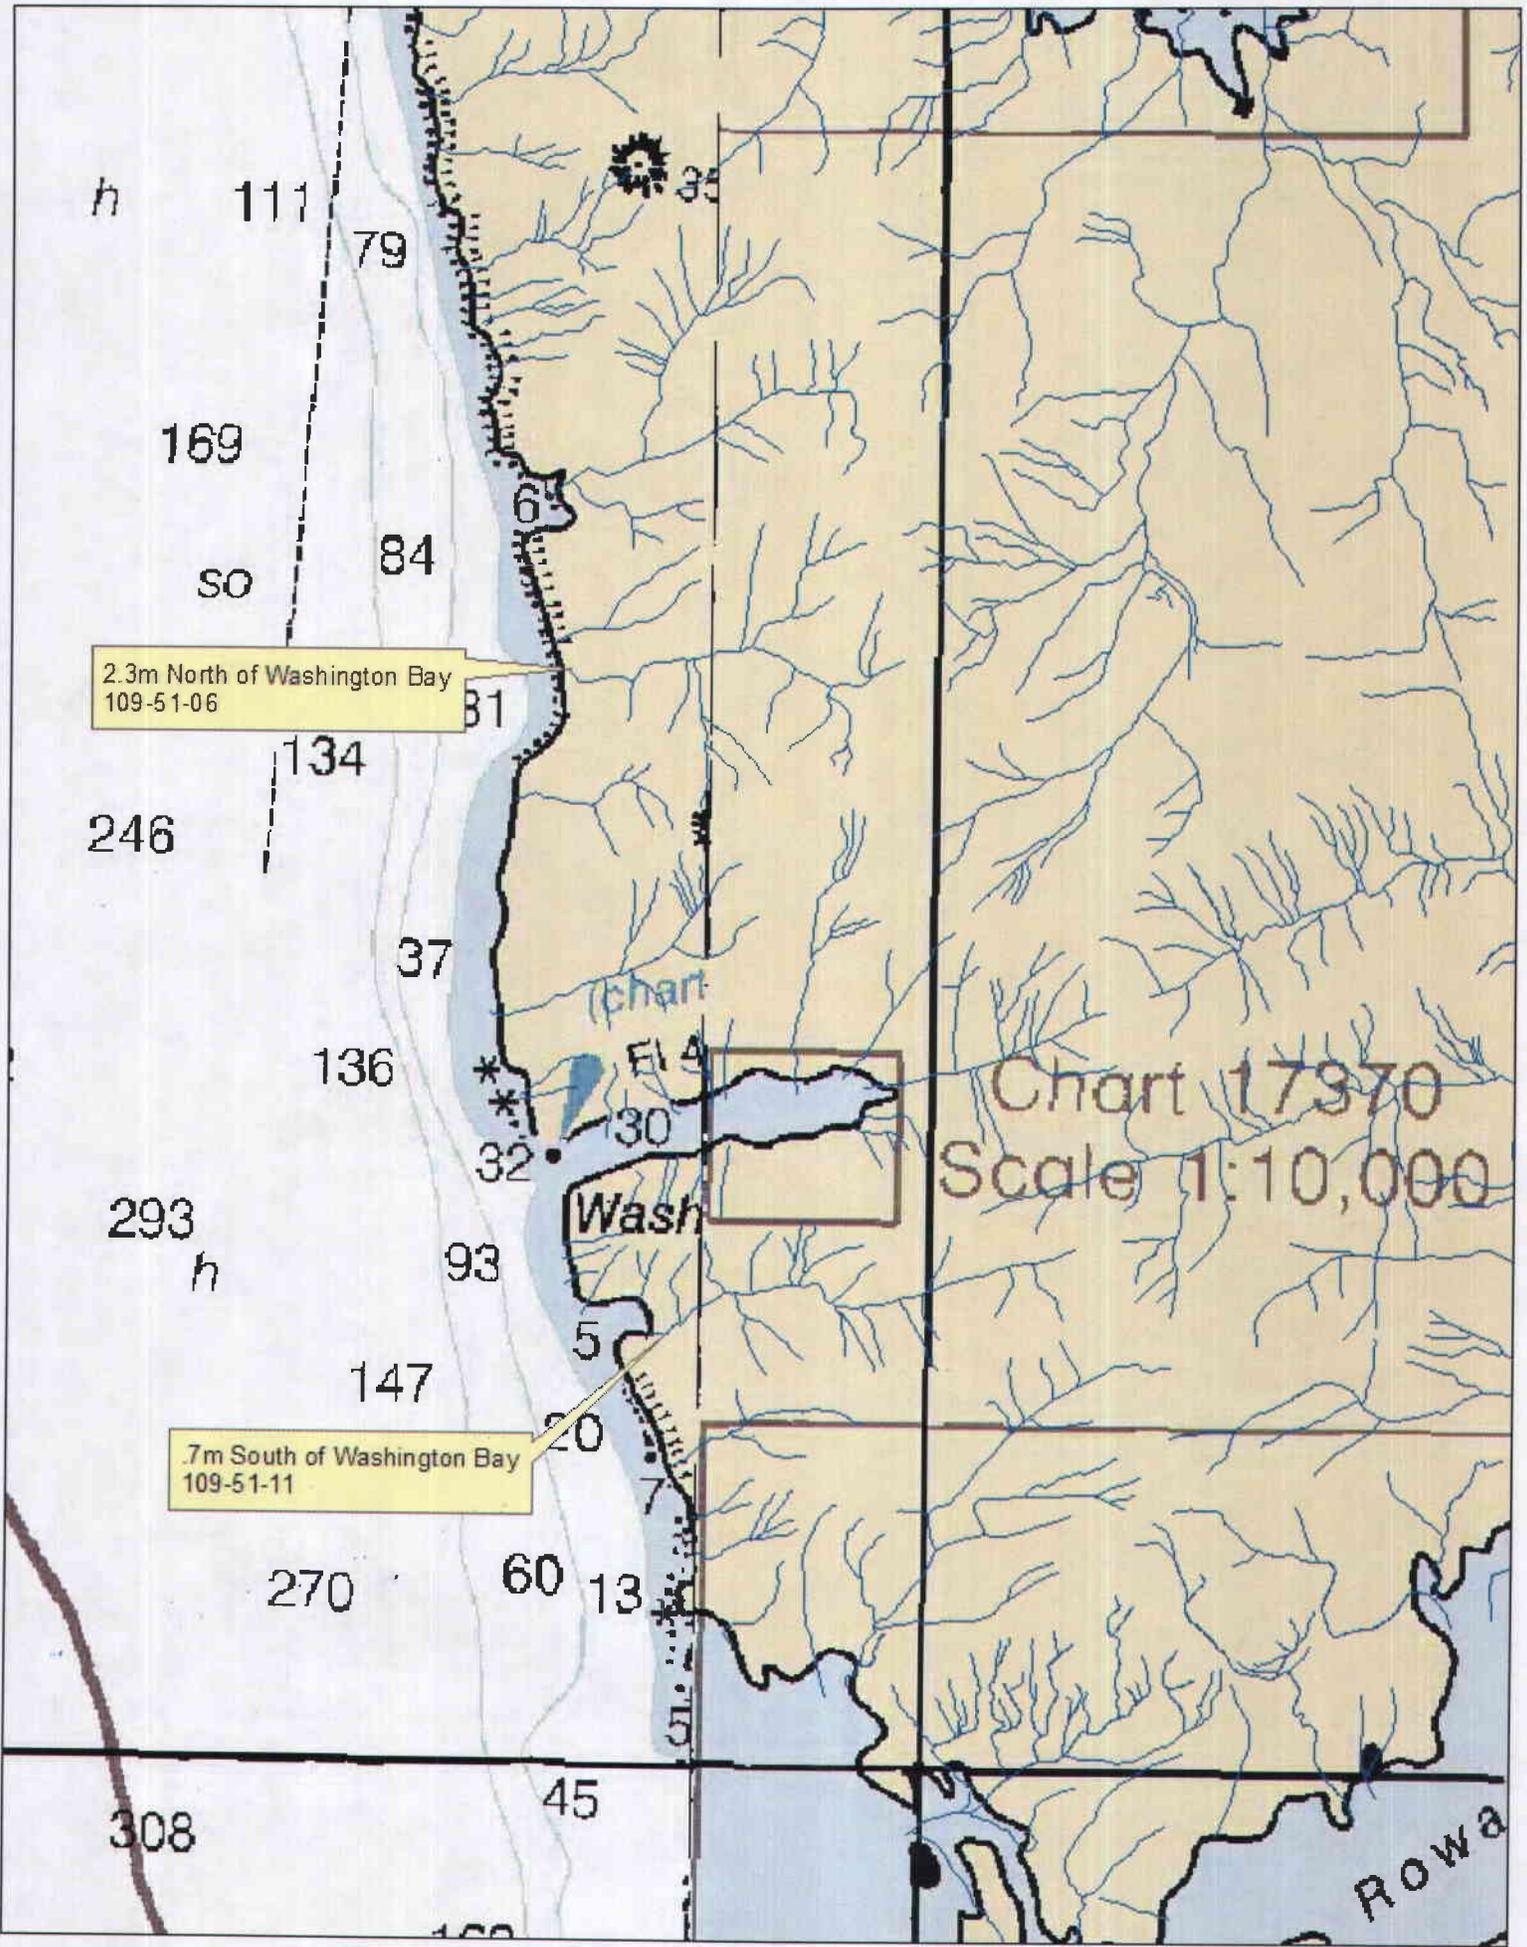

Upper Extent: Unknown

Add local name to dB  
Add PINK salmon spawning to new stream 109-51-10110  
shorter than 660ft

Name of Observer (please print): William Bergmann, Area Management Biologist  
Signature: [Signature] Date: 3/6/08  
Agency: ADFG-CFD  
Address: P.O. Box 667  
Peterburg, Alaska 99833

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Fish Distribution Database.

Signature of Area Biologist: [Signature] Date: 3/6/08 Revision 02/05
