OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
coho salmon	06/17/2008		✓		✓

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:

While conducting a road condition survey with Roy Josephson (DNR) and John Hillman (Sealaska), I trapped two coho salmon in a tributary to Spasski Creek (114-27-10300) on June 17, 2008. I was unable to walk the stream course back to Spasski Creek due to time constraints. I digitize the stream course based on aerial photos (see attachment).
Coordinates (Lat,Long): (58.0425,-135.2906)

Add new stream, 114-27-10300-2014 w/coho salmon fishing
Refer to orthoimagery and NHD hydrography for AC

Name of Area Biologist (please print): _____

Trap 5
Location:
58.0425,
-135.2906
Trapped 2 CO
(40, & 35 mm) on
06/17/08.

Spasski Creek
Stream No.
114-27-10300

Trap 6
Location:
58.0423,
-135.2904
No fish trapped on
06/17/08. The
tributary splits at
this location. Trap
5 and 6 were set
in separate
channels.
