OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:
Nomination to change stream alignment near Union St. and Main St. See attached narrative and map, and ArcGIS layer file.
Revise 115-32-10300-2002-3019 as indicated w/ map
DBF traces and ortho imagery
ref 09-1087

115-32-10300-2002-3019 Realignment

By: Kate Kanouse

Date of Nomination: September 23, 2009

Attachment: ArcGIS layer file: Union&MainStreamRealignment.lyr

In fall 2008, the Alaska Department of Transportation and Public Facilities removed a failing culvert in this stream and replaced it with a shorter, larger one set in a different alignment. The realignment changed the stream course, and consequently changed the 115-32-10300-2002-3019-4005 tributary confluence (see Figure 1), which is now at the new culvert outlet (N 59.2364 W 135.4593). Attached is an ArcGIS file containing the waypoints for the new stream alignment.

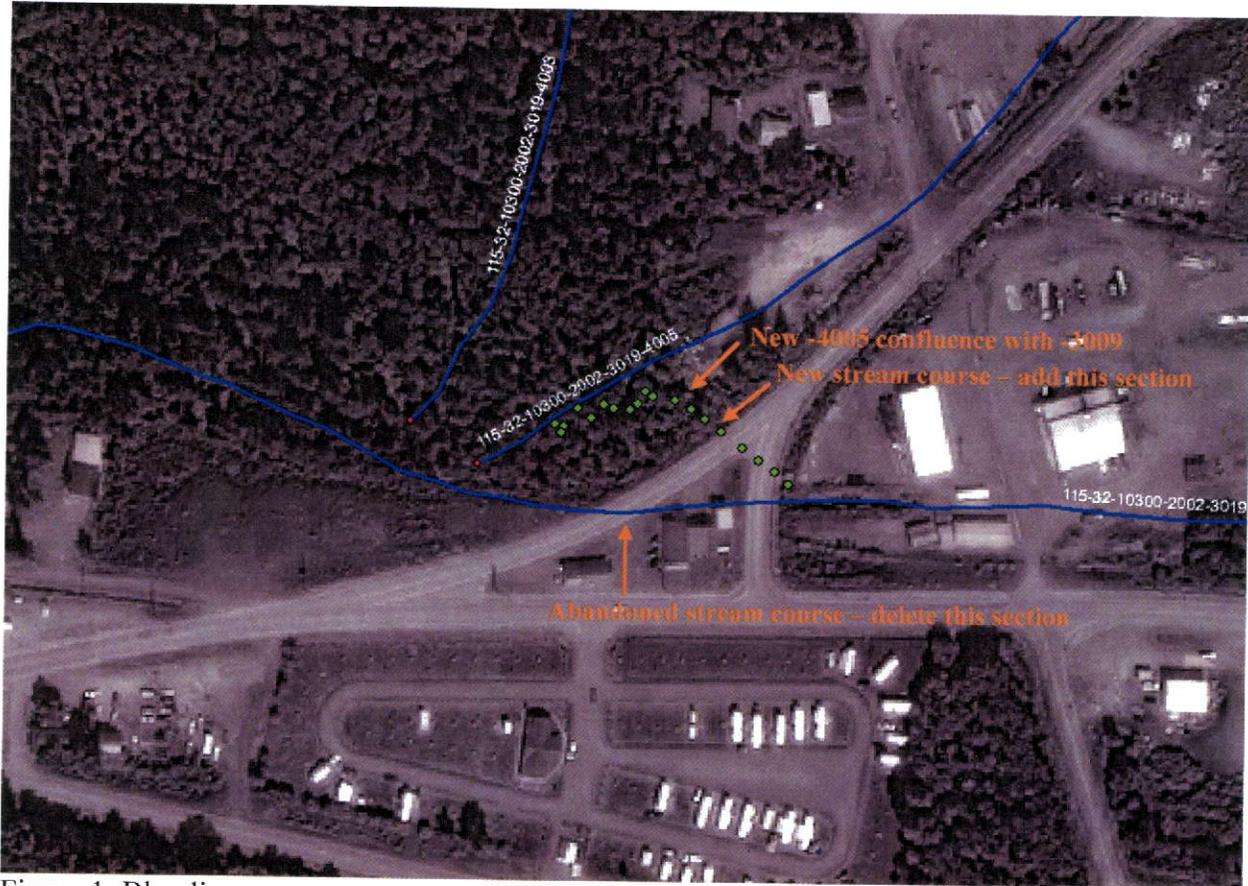

Figure 1. Blue lines represent streams listed in the 2009 *Catalog* and the green dots are waypoints I took along the new stream alignment.
