IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: An uncatalogued tributary of stream # 114-31-10130 was trapped as part of a road condition survey and found to have Coho present (see attached documents). Further research & trapping efforts should be made in this area. This stream should be added to the catalog as a tributary of stream # 114-31-10130 and mapped to correctly represent the streams path.
