OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
SOCKEYE SALMON	2008			X	<input checked="" type="checkbox"/>
COHO SALMON	2008			X	<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Sockeye (415 adults) and coho (130 adults) salmon observed @ Fish Lake weir, substantiates presence of sockeye and coho salmon in stream and lake

Name of Observer (please print): _____
 Signature: _____ Date: _____
 Agency: _____
 Address: _____

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Anadromous Waters Catalog.

Signature of Area Biologist: _____ Date: _____ Revision 05/08
 Name of Area Biologist (please print): _____

Subject: DSF REPORT: Fish Resource Permit SF2008-140 (Conitz/ADF&G-Falls Ck/Lake-Sockeye)
Attachments: SF2008-140f-1DSF.xls

o Troy,

his is one of several collection reports for FRPs held by Jan Conitz for weirs in which non-departmental staff were involved. She dn't feel she had time to file reports before leaving for a new job but did give me summary data which I put into the attached DSF. I assume the daily counts have already been distributed to proper folks within the Department.

heers,

ob
