*Add Chinook salmon and Steelhead Trout spawning to stream*

**Additional Comments:** This nomination provides information supporting the addition of Ks and SHs in AWC stream # 109-10-10090. The information used to generate this nomination was provided to the Alaska Department of Fish and Game as a stipulation of fish resource permit # SF2008-016. Based on both the size of the individual rainbow trout captured during this study and their proximity to the ocean, I would recommend that they are considered to be steelhead for the purposes of this nomination and the AWC.
