Additional Comments: This nomination provides information supporting the addition of CTP as well as backup information for CHp, Pp, Sp, and DVP in AWC stream # 112-67-10600. The information used to generate this nomination was provided to the Alaska Department of Fish and Game as a stipulation of fish resource permit # SF2008-054. Based on this location's proximity to the ocean, I would recommend that both the cutthroat trout and the Dolly Varden are considered to be anadromous for the purposes of this nomination and the AWC.
