Additional Comments: This nomination provides anadromous waters information in support of the backup of Sp in AWC stream # 113-72-10020. Specific station comments are included in the following pages. The information used to generate this nomination was provided to the Alaska Department of Fish and Game as a stipulation of fish resource permit # SF2009-052. The catch data reports that Ss were captured in this project but due to the location of the sampling (river delta) and the numbers caught in that single location I have nominated as backup for Sp rather than addition of Ss.
