OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
coho salmon	05/27/2010		✓		✓
sockeye salmon	05/27/2010		✓		✓

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:
On 5/27/10 I walked an uncataloged drainage to the East Alsek River beginning from the mouth. I seined a portion of a large pond located at N59.101665 W138.446461 and captured 21 rearing coho and 8 rearing sockeye. At the upper extent waypoint given above, I seined again and captured 10 rearing coho and 8 sockeye. I also observed numerous threespine stickleback. The drainage consists primarily of shallow wetland ponds that may only connect to the East Alsek River during high water events, and provides rearing habitat. We did not observe any spawning habitat. I will email J Johnson the GPS trackline of the stream course for this nomination.
Coordinates (Lat,Long): Upper(59.100439,-138.45063) Lower(59.102744,-138.442023)
Add new stream and take out coho and sockeye rearing
