OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
coho salmon	05/27/2010		✓		✓
sockeye salmon	05/27/2010		✓		✓

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

**Comments:**  
On 5/27/10 I walked an uncataloged drainage to the East Alsek River upstream to document fish use and the upper extent. At the stream mouth I captured rearing and coho using a hand net. I seined a portion of a lake at the upper extent and captured 11 rearing sockeye. Additional salmonid fish habitat may be available further upstream during high water events. The drainage and lake provides rearing habitat, we did not observe any spawning habitat. I will email J Johnson my GPS trackline for this stream nomination.  
Coordinates (Lat,Long): Upper(59.099078,-138.441506) Lower(59.097904,-138.446581)  
*Add new stream & lake w/ coho & sockeye salmon rearing*

Name of Observer (please print): Kate Kanouse
