OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
coho salmon	05/26/2010		✓		✓
sockeye salmon	05/26/2010		✓		✓

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:

We seined a portion of this uncataloged stream at the upper waypoint given above and captured 39 rearing coho and 206 rearing sockeye. Three minnow traps set for three hours upstream (N59.104425 W138.40899) in a shallow flooded meadow captured only threespine stickleback. The stream provides excellent rearing habitat, and drains directly to the East Alsek River near the mouth of Stream No 182-20-10100-2001.

Coordinates (Lat,Long): Upper(59.10474,-138.4111) Lower(59.10224,-138.41705)

Add new stream w/ coho and sockeye salmon Rearing
