OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:

Stream No. 115-34-10300-2031 was nominated in the late 1980s. Since then, the stream route has changed significantly. Habitat Biologists Sheila Cameron and I tracked the stream in 2009 and 2010. Attached are a subset of the waypoints taken along the stream and a map. The lower portions of this stream need to be re-routed because it flows under the newly constructed dike in a couple areas. We will submit route updates next year.
Coordinates (Lat,Long): Upper(59.49018301,-135.27618597) Lower(59.47411766,-135.2934799)
