IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers, etc.

Comments:

The lower portion of Stream No. 115-34-10300-2017 was re-routed in 2006. Attached are a series of waypoints taken starting at the highway and ending at the confluence with Skagway River and maps with the points and track. Data were collected on June 10, 2010.

Upper reach coordinates above are not the upper extent of anadromy; they are the upper extent of the re-routed portion of the stream (section in need of update).

Coordinates (Lat,Long): Upper(59.47621146,-135.2961814) Lower(59.47374903,-135.2932726)

Reverse hydrography of stream (tracks available)
