					<input type="checkbox"/>

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

**Comments:** Aerial Survey showed Eulachon in Carroll River. milt was seen from the air. on MARCH 27 U.S.F.S. Biologists observed eulachon and Eulachon eggs in Carroll River. Add eulachon spawning to creek. Extend stream downstream and reposition lower pt.
