IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Schools of Fish were seen in the creek 300 to 400 feet below the dam. Eggs were seen on rocks. It is estimated they were in the creek for about 7-10 days.

Name of Observer (please print): Scott Walker
 Signature: Scott Walker Date: 9/15/11
 Agency: ADF&G - CF
 Address: 2030 Sea Level Drive # 205
Ketchikan, AK 99901

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Anadromous Waters Catalog.
