OBSERVATION INFORMATION

| Species | Date(s) Observed | Spawning | Rearing | Present | Anadromous |
|-----------------|------------------|----------|-----------------|-----------------|------------|
| Coho Salmon | 8/8/2011 | | Yes; Count = 82 | | Yes |
| Dolly Varden | 8/8/2011 | | | Yes; Count = 6 | Unknown |
| Cutthroat trout | 8/8/2011 | | | Yes; Count = 13 | Unknown |

Add new stream Alaska salmon rearing change AWC # 108-40-10450-

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc. 2006 TC
2009

Comments: All fish captures were associated with an AKSSF funded research project (AWC Catalog Inventories in SEAK), which included stream habitat inventory, stream mapping, and identifying fish distribution patterns for updating the AWC and corporate hydrography databases. Fish capture methods employed baited and sterilized Gee Minnow Traps Minnow traps soaked for 1-6 hours or hand dip nets. All fish captured were identified to species and life stage noted, and released near the point of capture alive. Attachment pages/maps (see below) provide additional specific information regarding the presence of fish species, locations (latitude & longitude coordinates), number & species captured, and additional info.

Name of Observer (please print): Kathy Smikrud

Signature: [Signature] Date: 9/30/2011
Agency: ADF&G, Sport Fish Division
Address: Southeast Regional Office, 802 3rd Street, PO Box 110024, Douglas, AK 99811-0024

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Anadromous Waters Catalog.
Signature of Area Biologist: [Signature] Date 10/5/2011 Revision
02/08

108-40-10450

Upper Extent
Latitude: 56.54065
Longitude: -132.79349
82 juvenile coho salmon,
6 Dolly Varden and 13 cutthroat
caught in trib with minnow traps

Lower Extent
Latitude: 56.54311
Longitude: -132.77822
No sampling done for
lower extent, but trib
flows into existing AWC
arc

Mitkof Island
Nomination # 108-40-10450-XXX1
--All coordinate information provided in datum NAD83

-  Fish Observation Locations
-  Other ADFG Survey Pts
-No Fish Caught
-  Uncatalogued (AWC nomination)
-  AWC arcs
