OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
coho salmon	07/19/2010			✓	✓
cutthroat trout	07/19/2010			✓	

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:
 Little McGinnis Creek was surveyed for stream route accuracy and was found to extend past the cataloged upper limit. Coho and cutthroat trout were captured at waypoint 10, indicating end of fish presence. The stream reduced to a seep in a forested wetland. There is a tremendous amount of ATV activity in this area with riparian damage and in-stream riding.
 Coordinates (Lat,Long): Upper(58.447898,-134.64) Lower(58.4361,-134.642)
Extend stream w/coho salmon rearing

Little McGinnis Creek Route Correction (111-50-10500-2003-3054)

Little McGinnis Creek is located in the Southeastern Region, Juneau B-2. This anadromous stream is a tributary to Montana Creek, just downstream of the mouth of McGinnis Creek. This stream was surveyed July 19-20th, 2010 and was found to extend past the cataloged upper limit. Intense ATV use has impacted this stream with multiple crossings. Approximately 337 meters of anadromous fish use has been added to the existing cataloged route. The following table and map provide survey data, new route, and feature locations.
