Hi J,

I discovered a discrepancy between in the AWC arc for Taain Creek (106-44-10030) in Petersburg (PET C3). I've attached the nominated for the route correction submitted in 1992, that corrects the route to end below the highway.

This change is reflected in the Regulatory Maps and the 2012 Atlas. This route correction is not shown in the online interactive map, the 2012 AWC Arc layer, or the 2012 Catalog.

This is also the case for Stream 106-44-10038 nearby.

Thank you,

Johnny Zutz

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

Jon Stephans (Commercial Fisherman) lives next to this stream and reports the every year as many as 50 pink salmon spawn in this stream up to the Mitkof Highway bridge. On 9/8/88 4 adult pinks were still alive in the stream after a flood and during a year with poor escapements. The Mitkof Highway culvert blocks upstream fish passage.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.

Johnny,

Here is the waypoint you requested. 56.72233, -132.92976. It is a very large culvert. I hope this helps and the kittys are great!

Hey Nicole,

Could you grab a waypoint for the culvert outlet just below the road for 106-44-10038. Unless you have plans to survey that area soon and then we can get it then.

Thanks,

Johnny
I was wondering if you have a good idea of the location of the highway culvert where the upper extent of 106-44-10038 is located?
I can take a SWAG looking at imagery but shadows are making mapping the stream course from the cabin east to the highway challenging.
