OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:
According to the AWC stream # 106-44-10240-2021 name is West Fork Ohmer Creek. There is already a West Fork Ohmer Creek in the Ohmer Creek drainage. Also, we surveyed this area and we could not find W.F. Ohmer Creek. We found a creek taking a different route which appears to be the upper extent of the Blind River.
Remove name from DB renumbers 106-44-10240-304
