106-44-10150 ROUTE CORRECTION

Stream: 106-44-10150 (cataloged for COP)

Watershed: Petersburg Creek-Frontal Wrangell Narrows

MTRS: C060S080E, Petersburg C-3

Date Surveyed: June 16, 2013

Findings: We surveyed this cataloged stream and found the route differs from the AWC. Using a handnet we caught coho salmon below the culvert. At the time of sampling water levels were very low due to the lack of rain over the summer. We ended this survey upstream of the culvert because there was not much water.

Recommendations: Update the stream route in the AWC.

Table 1.– 106-44-10150 survey data.

Waypoint	Latitude	Longitude	Notes	Sample Effort	Sample Results
599	56.6206	-132.8478	Mouth of tributary into Blind Slough. Tracking.		
600	56.6209	-132.8474	The water is very low because there has been no rain in the past week. At high water the fish could make more use of the stream.	HN	3 CO
601	56.6211	-132.8473	Upstream side of culvert. Not much water. Calling it the top.		
602	56.6210	-132.8474	Downstream side of culvert.
