Additional Comments: This additional nomination provides information to support fish presence for juvenile dolly varden for an unnamed uncataloged waterbody that drains into 106-44-10012, a known anadromous stream. This information was collected as part of the ADF&G Fish Passage Project. First upstream trap was set 11' from the culvert and produced no fish. Second upstream trap was located 49' from culvert and produced 1 juvenile dolly varden.
