Site Information Station: SEA13MIT26 Date Observed: 07/16/2013 Legal Desc.: C061S081E Latitude: Longitude: Datum: 56.59969 -132.76933

Station Comments: Stream is ditched upstream for about 50 feet before turning up a steep hill. Where creek enters ditch flow is split between this culvert and MIT25. During higher flows both culverts are probably interconnected with flow. Downstream, creek runs through clear cut electrical easement that is very overgrown.

Additional Comments: This additional nomination provides information to support fish presence for juvenile coho for an unnamed uncataloged waterbody that drains into 106-44-10240-2041. This information was collected as part of the ADF&G Fish Passage Project. Upstream trap was set 70' upstream and produced no fish. Downstream trap was located 20' from culvert and produced 3 juvenile coho.
