Site Information Station: SEA13MIT23 Date Observed: 07/15/2013 Legal Desc.: C061S081E Latitude: Longitude: Datum: 56.59441 -132.75488

Station Comments: Narrow stream, travels through powerline clearcut directly above inlet. This clearcut has likely altered the natural morphological characteristics of the stream and OHW measurements may not be entirely representative. Stream is obscured by and overgrown with dense foliage providing excellent organic input. Past outlet stream runs in ditch for 150-200', and below that the channel is new and very poorly developed, clearly recently diverted to the current location when the road was built.

Observation Information

Life History:

Species\LifeStage: cutthroat trout juvenile/adult
Species\LifeStage: coho salmon juvenile
Species\LifeStage: Dolly Varden juvenile/adult

Sampling Method (No. of fish): A (1) B (3)
Sampling Method (No. of fish): A (1) B (4)
Sampling Method (No. of fish): A (7) B (9)

Sample ID: (A) Sample Gear: Minnow Trap
Sample ID: (B) Sample Gear: Minnow Trap

ALASKA DEPT. OF FISH & GAME

JUN 5 2014

Add new stream w/ coho salmon
Pending

Additional Comments: This additional nomination provides information to support fish presence for juvenile coho, juvenile/adult dolly varden, and juvenile/adult cutthroat trout for an unnamed uncataloged waterbody that drains into 108-40-10500-2103-3004. This information was collected as part of the ADF&G Fish Passage Project. Upstream trap was located 2' from the culvert and produced 6 juvenile/adult dolly varden, 1 juvenile/adult cutthroat trout, and 1 juvenile coho. Downstream trap was located 4' from culvert and produced 4 juvenile coho, 9 juvenile/adult dolly varden, and 3 juvenile/adult cutthroat trout.
