OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Cutthroat trout	May 12, 2014	2		1	<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments
 Pair of cutthroat trout observed spawning in Cannery Creek upstream of Mud Bay Road culvert at N 59.17069, W 135.38721. One additional adult CT observed at N 59.17016, W -135.38542. (WGS84 map datum)
 Culverts under Mud Bay Road and Haines Packing Company driveway allow good fish passage at most water levels.
Add Cutthroat trout spawning to creek

A legend box in the top right corner of the map. It contains three entries: a green cross symbol for 'CT pair 2014 May 12', a red square symbol for '2014 AWC sea_point', and a blue line symbol for '2014 AWC sea_arc'. Below the legend is a scale bar with markings at 0, 500, and 1,000 feet. To the left of the scale bar is a north arrow pointing towards the top of the map.
