WOODPECKER COVE ADDITION 2

ADDITION

Water body name:

Survey date: 7/14/2013

Water body number:

Species & Lifestage:

Watershed: Ohmer Creek-Frontal Sumner Strait

MTR: C062S081E **Quad:** Petersburg C-3

Findings: We surveyed this stream from where it crosses Woodpecker Cove Road. We did not capture any fish until we were below a 20' waterfall (Figure 1). We caught coho salmon and cutthroat trout using an electrofishing unit (Table 1). We ended the survey where stream enters the ocean.

Recommendations: Add stream to AWC.

Table 1.-Woodpecker Cover addition 2 survey data.

Waypoint	Latitude	Longitude	Notes	Sample Effort	Sample Results
83	56.5008	-132.7928	Mouth of stream into ocean. Made of fair size rocks with sharp edges. This lower reach is down to bedrock in a lot of places. Would not think that this stream is very good spawning habitat at this time.		
82	56.5009	-132.7930	Young of year.	EF	3 CO
81	56.5014	-132.7935	Young of year.	EF	2 CO
80	56.5031	-132.7930	A Waterfall that is about 20'. Explains why we got no fish while electrofishing down from the road. Captured cutthroat trout about 14 cm.	EF	2 CUT

Figure 1.—Nicole Legere at the base of 20' waterfall.
