IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments add coho on lake spawning telemetry to creek

Stream coordinates: 55.21545, -132.60409. A small number of rearing Coho Salmon have been caught in this stream in the four years of sampling (2 Cohos caught in traps 10-20-11; 2 Cohos caught in traps 4-25-12; 5 Cohos caught in traps 8-5-13; 5 Cohos caught in traps 8-21-14). A few adult Coho Salmon have also been counted in adult escapement surveys in three of the past 4 years (12 Cohos counted on 9-25-11; 1 Coho counted on 9-24-12; 1 Coho counted on 8-27-14).
