Observation Information

Life History:

Species\LifeStage: Dolly Varden juvenile/adult

Sampling Method (No. of fish): A (2)

Key To Sample Events

Sample ID: (A) Sample Gear: Minnow Trap  
Sample ID: (D) Sample Gear: Minnow Trap

*Update stream hydro, reposition pts, retain species*

Additional Comments: This information was collected as part of the ADF&G Fish Passage Project. This nomination supports the addition for presence of dolly varden char in 103-60-10504. Fish were trapped above and below the road crossing. It also supplies location correction information, the road crossing of this stream should be moved to 55.47948, -133.12686.

OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
pink salmon	9/27/01	2			<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

**Comments:** A previous nomination/correction for this stream was submitted by Mark Minnillo on 10/3/00, requesting that this stream be added as pink salmon spawning in the lower half of the stream below the Craig-Klawock highway. Two adult pink salmon were observed on 9/27/01 just below the highway crossing, indicating that no barriers exist from saltwater to the highway.

Action: Add pink salmon spawning up to the Craig-Klawock highway.

**Subject:** Pumphouse Creek  
**Importance:** High

Hi Ed--

I'm looking for info on Pumphouse Creek, within the city limits of quad Craig B-4. It crosses under the highway through a culvert. Jim Durst tells me "the catalog used to have it cataloged for P well above the road, but had it connected to the stream mouth that was filled in behind the Rocky Mountain Helicopter bunkhouse. We got the mouth moved, but they dropped the cataloging. I got it back cataloged for CO up to the road based on trapping and connectivity."

I don't see it on the latest Atlas or in the 1998/99 version of the catalog itself. Of course I don't know what the stream number is, for sure: I'm guessing that it may be (or have been) 103-60-10501, because -10500 is Crab Creek (a sizable stream), and 10502 and 10503 are the two creeks just west of Pumphouse Creek.

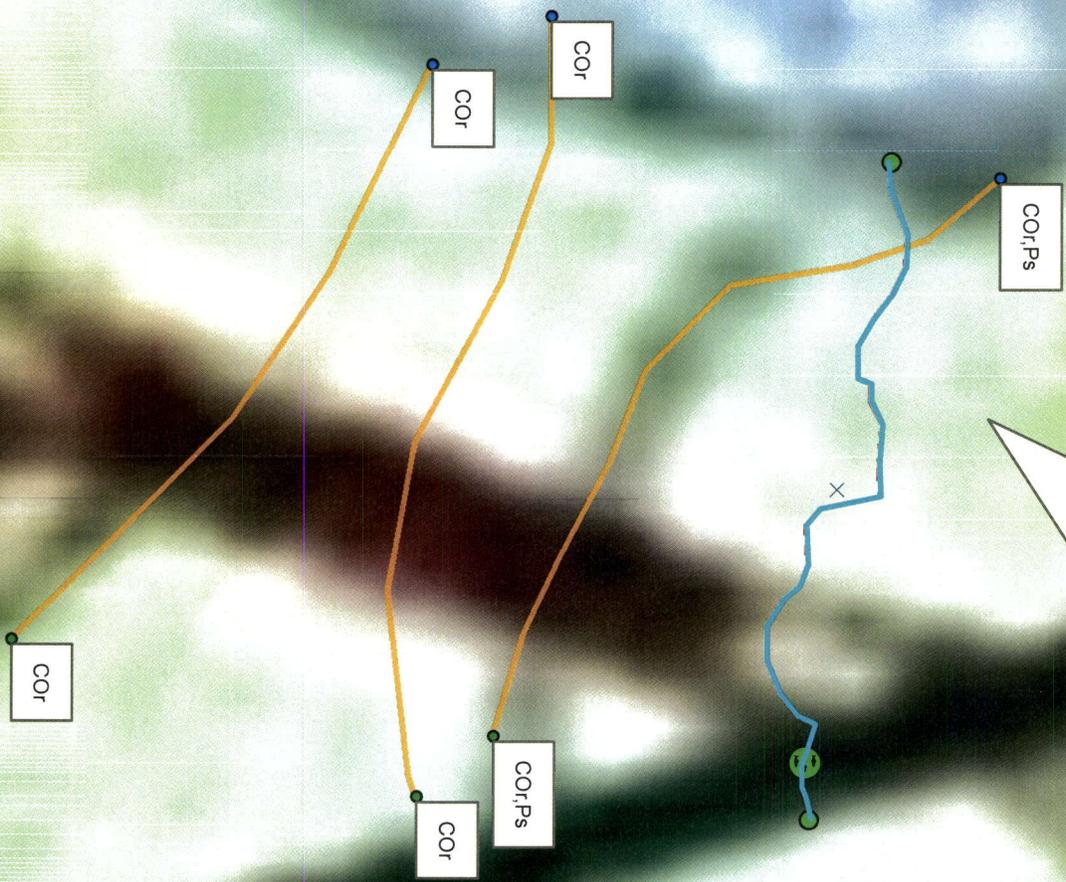

Can you tell me anything about this creek? DOT is planning a trail that would cross it upstream of the highway, which has a perched culvert. If it's not in the system, would the easiest thing be to re-nominate it? Thanks.
