Additional Comments: This information was collected as part of the ADF&G Fish Passage Project. This nomination supports the addition for presence of cutthroat trout for 108-40-10282. Outlet empties directly into tidal area. Entire span between inlet of PRK01 and outlet of ZIM01 is human influenced. However, there is more water at this site than ZIM01 due to seepage so no widths taken. Likely some constriction issues. Boulder headwall up and downstream, outlet damaged from boulders shifting. Subsistence at outlet has created slight compound gradient. Cutthroat and sculpin trapped.
