**Additional Comments:** This information was collected as part of ADF&G's Fish Passage Assessment project, This nomination supports the addition of cutthroat trout and dolly varden rearing and/or present in AWC stream #106-44-10105. Nice habitat upstream and downstream from culvert. Upstream gradient is about 6% for about 200 feet and then levels out to 2-3%, nice pools and riffles. Downstream runs for about 500-600 feet before running into Blind Slough. Nice gravels downstream with pools and riffles. There is an old notched log weir about 50 feet downstream that the stream channel has gone around and under.
