Additional Comments: This information was collected as part of ADF&G's Fish Passage Assessment project. This nomination supports the addition of the species cutthroat trout, rearing and present to AWC Stream #106-44-10103, DelMar Creek. Upstream channel follows road for about 400 feet before turning uphill into the woods. Nice habitat downstream with lots of log controlled deep pools. Water is very tannic. Juveniles observed upstream and downstream of culvert. Downstream channel appears to be entirely log controlled.
