Nomination #	150244	Fisheries Scientist	Date
Revision Year:	2016	Habitat Operations Manager	Date
Revision to: Atlas	Catalog	99	16 July 15
Both		AWC Project Biologist	Date
Revision Code:	F-1	GIS Analyst	Date

Site Information Survey: SEA14COR02 Date Observed: 08/04/2014 Legal Desc.: C068S081E02 Latitude 56.00261 Longitude -132.83612 Datum WGS8  
Site: 10103354

Observation Information

Life History:

Species\LifeStage: Dolly Varden juvenile/adult

Sampling Method (No. of fish): A (1)

Key To Sample Events

Sample ID: (A) Sample Gear: Minnow Trap  
Sample ID: (B) Sample Gear: Minnow Trap

Only 1 Fish, DV Anadromy Unknown

**Additional Comments:** This information was collected as part of the ADF&G Fish Passage Project. This nomination supports the addition of a small uncatalogued stream that drains directly into Coffman Cove on Prince of Wales Island and the addition of Dolly Varden present to that stream. Upstream was clearly used to yard logs and/or run machinery when this area was logged 40-50 years ago. Few grade points, not much fine sediment, virtually no wood. Downstream condition is similar, but some legacy cut stumps and riprap boulders are incorporated into the substrate, supplying some structure, pools, and variability to the existing habitat. Upstream-V rock weir is constructed 10' below outlet. Does not appear to have constriction issues, current upstream OHW in the 3-4' range.
