Additional Comments: This information was collected as part of ADF&G's Fish Passage Assessment Project. This nomination supports extending the of anadromy for dolly varden at least up to road crossing for AWC Stream #108-60-10051. Stream splits about 22 feet upstream. Nice habitat upstream and downstream with deep pools and riffles. There is an old wooden structure downstream, possibly an old dam or crossing. Downstream gradient increases about 50 feet downstream from outlet.
