Additional Comments: This information was collected as part of ADF&G's Fish Passage Assessment Project. This nomination supports extending the of anadromy for dolly varden at least up to road crossing for AWC Stream #108-60-10051. Creek becomes unwalkable about 20 feet upstream and downstream due to downed trees and vegetation. Constriction does not appear to be an issue with this site. Downstream channel shows signs of grass and moss in the channel, stream may go dry at times. Nice habitat upstream. Stream converges with creek from culvert 10203326 on same road about 500 feet downstream.
